Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Applicant's arguments with respect to claims 31-38 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 31-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsinberg (US4794447) in view of Tanaka et al (US4309726).

Tsinberg discloses a receiver (Fig. 1) comprising of a HDTV decoder (26) and monitor (28). Tsinberg, therefore, fails to teach "a controller operable to examine the quality of the data stream, an output unit operable to output the HDTV signal and to stop outputting the HDTV

Art Unit: 2634

signal when the quality of the data stream is lower than a predetermined acceptable quality for a predetermined period of time”.

Tanaka et al discloses PCM reproducing unit (Fig. 2, Abstract) wherein the outputting of the decoded signals is controlled by “a controller” (23) and “an output unit” (25). It would have been obvious to one of ordinary skill in the art at the time of the invention to implement Tanaka et al’s quality control technique for use in Tsingberg’s television receiver. Such modification would overcome the noise problem associated with reproduced signals.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amanda T Le whose telephone number is (571) 272-3052. The examiner can normally be reached on 10:30 A.M. through 4:30 P.M..
